

Introducing showoff2pdf

by Ryan Stenhouse

showoff2pdf is a new utility that uses Prawn to convert your ShowOff presentations to PDF Documents.

Introducing showoff2pdf

- Uses on Prawn to dynamically generate PDF files from Markdown Slides
- Favours sensible defaults to make readable and printable documents
- Just depends on Ruby and Prawn (---pre)
- Based on my Markdown Prawn library

Supports Images

Multi

Level

Headings

Supported features continued

```
$ cat slide.md | ./md2pdf > slide.pdf
```

```
$ formatting for command line segments
```

What doesn't work

- Custom CSS styles and the like will not be preserved, if you want that, then use Prince
- For obvious reasons, executing Ruby or JavaScript won't work.
- A lot of inline HTML will be silently dropped.
